

Critical Information Summary

Business NBN (TC4) Services

December 2024

Service Description

Business NBN services provide high-speed internet solutions designed for small to large businesses. They utilise the National Broadband Network (NBN) infrastructure and offer enhanced features such as prioritised bandwidth, business-grade support, and service guarantees.

Key Features and Applications

- Speeds equal to upload and download speeds delivered on best effort basis for seamless data transfer.
 - Bandwidth is easily scalable as business requirements evolve.
 - Dedicated support through our support team for troubleshooting and maintenance.
 - Data Prioritisation with traffic management to ensure consistent performance during peak usage.
 - Supports VoIP phone systems, cloud computing, video conferencing, and point-of-sale systems.
 - Suitable for remote working, secure data transfer, and large-scale business operations.
 - Backup connectivity options available for 4G/5G backup to ensure continuous operation during outages.
-

Plan Inclusions

- Plan speeds range from 25/5 Mbps - 1000/50 Mbps. Scalable services based on business needs; availability of speeds vary.
 - Unlimited data, fair use policy applies.
 - Static IP Address: Suitable for hosting servers, VoIP, and remote access solutions.
 - Standard Service Level Agreement (SLA) for fault response times depending on the plan.
 - Optional Add-Ons: Costs for advanced routers, backup 4G/5G services, and network management tools.
-

Limitations & Exclusions

- Connection type (FTTP, FTTN, HFC, FTTC, Fixed Wireless, or Satellite) affects performance and speed.
 - NBN performance may be impacted by network congestion during peak times.
 - Service availability in rural or regional areas may be limited.
-
